

Zoning Text Amendment No.: 19-08
Concerning: Bicycle Parking –
Requirements & Design
Standards
Draft No. & Date: 1-5/3/2019
Introduced: 10/22/2019
Public Hearing:
Adopted:
Effective:
Ordinance No.:

**COUNTY COUNCIL FOR MONTGOMERY COUNTY, MARYLAND
SITTING AS THE DISTRICT COUNCIL FOR THAT PORTION OF
THE MARYLAND-WASHINGTON REGIONAL DISTRICT WITHIN
MONTGOMERY COUNTY, MARYLAND**

Lead Sponsor: Council President Navarro at the Request of the Planning Board

AN AMENDMENT to the Montgomery County Zoning Ordinance to:

- amend the bicycle parking requirements;
- amend the bicycle parking design standards; and
- generally amend the provisions concerning bicycle parking and parking design

By amending the following sections of the Montgomery County Zoning Ordinance,
Chapter 59 of the Montgomery County Code:

Division 6.2. “Parking, Queuing, and Loading”
Section 6.2.3. “Calculation of Required Parking”
Section 6.2.4. “Parking Requirements”
Section 6.2.6. “Bicycle Parking Design Standards”

EXPLANATION: ***Boldface** indicates a Heading or a defined term.*

Underlining indicates text that is added to existing law by the original text amendment.

[Single boldface brackets] indicate text that is deleted from existing law by original text amendment.

Double underlining indicates text that is added to the text amendment by amendment.

[[Double boldface brackets]] indicate text that is deleted from the text amendment by amendment.

** * * indicates existing law unaffected by the text amendment.*

ORDINANCE

The County Council for Montgomery County, Maryland, sitting as the District Council for that portion of the Maryland-Washington Regional District in Montgomery County, Maryland, approves the following ordinance:

Sec. 1. DIVISION 59-6.2 is amended as follows:

* * *

Section 6.2.3. Calculation of Required Parking

* * *

I. Adjustments to Vehicle Parking

* * *

**7. Adjustments Allowed Only in Commercial/Residential and
Employment Zones**

* * *

c. Bike-Share Facility

A bike-share facility with a minimum of 10 spaces may be substituted for 3 vehicle parking spaces if the bike-share facility is accepted by the Department of Transportation as part of an approved comprehensive plan of bike-sharing stations.

d. Changing Facilities - Showers and Lockers

The deciding body may reduce the required number of vehicle parking spaces by 3 spaces for each additional changing facility provided above the minimum required under Section [6.2.6.A.4] 6.2.6.B.3. A changing facility must include a shower and lockers [provided separately for each gender].

Section 6.2.4. Parking Requirements

A. Using the Parking Tables

Uses on the parking table match the allowed uses and use groups in Article 59-3. The number of required spaces is based on a metric specific to each use. If the proposed intensity of the use is less than the metric in the tables in [subsection] Subsections B and C, the baseline minimum is calculated using

a fraction of that metric. The number of vehicle parking spaces required also depends upon whether the property is located in or outside of a Parking Lot District or Reduced Parking Area.

* * *

C. Bicycle Parking Spaces

USE or USE GROUP	Metric	Agricultural, Rural Residential, Residential, and Industrial Zones		Commercial/Residential and Employment Zones	
		Minimum (Maximum)	% Long-Term	Minimum (Maximum)	% Long-Term
RESIDENTIAL					
Household Living					
Multi-Unit Living	Dwelling Unit (10[20]+ Units Only)	0.35 (100 max <u>per building</u>)	95%	0.50 (100 max <u>per building</u>)	95%

Section 6.2.6. Bicycle Parking Design Standards

Definitions.

In this section, except where specified otherwise, the following words and phrases have the meanings indicated:

Bicycle Locker: A space intended to store one bicycle that is locked from the outside, rather than securing the bicycle itself.

Inverted-U Rack: In the shape of an upside-down “U”, staple, or loop, this rack provides two points of ground contact and two points of contact for supporting a bicycle.

Secure Parking Area: A weather-protected, standalone bicycle parking structure or building extension with shared racks and access control.

A. Dimensions and Bicycle Racks

1. Parking Space and Aisle Dimensions

a. Each horizontal parking space (a space provided parallel to the ground) must have a minimum length of 72 inches, a minimum width of 18 inches, and a minimum height of 84 inches. If an inverted-U or similar rack is provided, one rack may serve two bicycles if it is installed so that it provides the minimum parking space dimensions on each side.

b. When a parking space is provided perpendicular to the ground, the vertical clearance of the space must be a minimum of 75 inches and the depth (measured along the floor from the anchoring wall) must be a minimum of 48 inches. The width of the space must be a minimum of 30 inches.

- c. A minimum of 10% of long-term parking spaces must be at least 120 inches long and 30 inches wide.
- d. A bicycle parking facility must have an access aisle that is a minimum of 72 inches on at least one side of a row of parked bicycles.

2. Racks

A bicycle rack must:

- a. permit a bicycle frame and one wheel to be locked to the rack with a high-security lock;
- b. permit a bicycle to be securely held with its frame supported in at least 2 places;
- c. be durable and securely anchored;
- d. have a locking surface thin enough to allow standard u-locks to be used, but thick enough so the rack cannot be cut with bolt cutters; and
- e. not include any elements within the interior space.

A bicycle room with appropriate parking space/aisle dimensions.

[A]B. Long-Term Spaces

1. Location, Access, and Security

- a. Each long-term bicycle parking space must be provided within a building, covered parking garage, or [bicycle locker] secure parking area located near the building or structure and the street or other bicycle right-of-way. Bicycle lockers do not satisfy the requirements for long-term bicycle parking.
- b. Facilities for long-term bicycle parking include: bicycle rooms on the ground floor of a residential/commercial building, bicycle rooms in a parking garage, bicycle cages in a parking garage, and secure parking areas.
- c. When a development project includes multiple buildings, the total number of parking spaces required will be calculated for the entire project and distributed proportionally to each building based on its share of the total parking space requirement. When the long-term bicycle parking for multiple buildings is co-located, it must be within 200 feet of an entrance to each of the participating buildings.
- [b]d. Each space must be available and accessible for all building tenants during the building's hours of operations. For residential tenants, each space must be accessible 24 hours a day, 7 days a week.
- [c]e. A long-term bicycle parking space in a garage:
 - i. must be clearly marked as a long-term bicycle parking space;

- ii. must be located no lower than the first complete parking level below grade, and no higher than the first complete parking level above grade;
- iii. must be in a well-lit, visible location near the main entrance or elevators; [and]
- iv. should be separated from vehicle parking by a barrier that minimizes the possibility of a parked bicycle being hit by a car[.]; and
- v. must be outfitted with a rack to lock the bicycle, as defined in Section 6.2.6.A.2.

[d]f. If a long-term bicycle parking space is in an enclosed area, the facility must not be accessible to anyone without authorized access.

[e. If a locker is provided, the locker must be securely anchored.]

[f]g. Each facility must be well-maintained and well lit.

h. If the bicycle storage area requires the use of doors, doors must be fully automatic or automatically open with the push of a button.

i. Stacked bicycle racks, or racks that increase parking capacity by providing more than one tier, must:

i. include a mechanism that lowers upper-level loading trays;

ii. have an aisle with a minimum width of 84 inches; and

iii. be designed so that users can easily lock the bicycle from the aisle.

[2. Space Dimensions

a. Each long-term bicycle parking space must have:

- i. a minimum vertical clearance of 75 inches for spaces other than lockers;
 - ii. a minimum vertical clearance of 48 inches for a locker;
 - iii. a minimum length of 72 inches and width of 24 inches if a bicycle is placed horizontally; and
 - iv. a minimum length of 40 inches and width of 24 inches if a bicycle is placed vertically.
- b. A bicycle parking facility must have an aisle a minimum of 4 feet in width between rows of bicycle parking spaces and the perimeter of the area devoted to bicycle parking.
 - c. If a room or common locker is not divided into individual spaces, each 12 square feet of floor area is counted as one bicycle parking space.
 - d. If a bicycle parking facility has a manufactured metal locker or stall, each locker or stall devoted to bicycle parking is counted as one bicycle parking space.]

[3]2. Signs

If a long-term bicycle parking facility is not visible from the street or main building entrance, the property owner must post a sign in a lobby or common area indicating the location of the bicycle parking.

[4]3. Changing Facilities – Showers and Lockers

- a. Any individual tenant space with more than 50,000 square feet of nonresidential gross floor area (excluding retail or uses with less than 50 employees during the largest shift)[,] must have at least [one] two all-gender, single-stall, combined shower/[and]changing rooms for each building. [facility for each gender, unless the] If a development with more than

50,000 square feet of nonresidential gross floor area (excluding retail or uses with less than 50 employees during the largest shift) has shower and changing facilities in a common area that is available to all tenants, at least two all-gender, single-stall, combined shower/changing rooms must be provided for each building.

Two [One] additional [shower] showers and changing facilities [facility per gender] must be installed for every additional 50,000 square feet of nonresidential gross floor area (excluding retail), up to a maximum of [3 for each gender]8 for each building. Additional showers beyond the first two all-gender, single-stall facilities may be co-located into gender-specific, multi-stall facilities evenly distributed between genders.

- b. If a long-term bicycle storage facility is required for a nonresidential use, the facility must have a minimum of 0.6 [0.3] clothing lockers for each required long-term storage space [for each gender]. Each clothing locker must be:
 - i. a minimum of 12 inches wide, 18 inches deep, and 36 inches high;
 - ii. available for use during all hours that employees are on-site; and
 - iii. installed adjacent to the showers and changing facilities in a safe and secured area.
- c. Section [6.2.6.A. 4] 6.2.6.A.3 does not apply to a public parking facility.

4. Repair Stations

A multi-unit dwelling with 10 or more units and all commercial buildings must provide at least one bicycle repair station or equivalent facilities for bicycle repair and maintenance. The repair station should be co-located with long-term bicycle parking and include a repair stand. The repair stand must include a clear area measuring a minimum of 90 inches by 45 inches, with the back of the repair stand placed at least 12 inches from the wall. A basic repair stand should have:

- (a) a supporting arm to hold a bicycle without causing damage;
- (b) basic tools attached to the stand with tamper-proof hardware;
- and
- (c) an air pump attached to the stand with tamper-proof hardware.

5. Electric Bicycle Charging

All long-term bicycle parking facilities must be equipped with at least one outlet for every five spaces, evenly distributed throughout the long-term bicycle parking facility.

[B]C. Short-Term Spaces

1. Location, Access, and Security

- a. Each short-term bicycle parking space must be:
 - i. available to the public;
 - ii. located in a convenient, well-lit area that is clearly visible to both a visitor to the building and a person who is on the sidewalk that accesses the building's main entrance;
 - and
 - iii. within 90 feet [from]of:

- 208 (a) the main entrance of [any] each building within the
 209 development, and closer than the nearest non-
 210 accessible vehicle parking space; or
- 211 (b) at least one main entrance of a building with more
 212 than one main entrance; unless
- 213 (c) the applicable deciding body approves an
 214 alternative location during the site plan or
 215 conditional use process[.]; and
- 216 iv. outfitted with a rack to which a bicycle can be locked, as
 217 defined in Section 6.2.6.A.2.
- 218 b. Each parking facility is prohibited from obstructing pedestrian
 219 traffic or interfering with the use of the pedestrian area.
- 220 c. Any sidewalk rack that is:
- 221 i. [parallel] *parallel* to the curb must be located so that the
 222 nearest vertical component of the rack is a minimum of
 223 24 inches [2 feet] from the curb face and 36 inches from
 224 the building face;[.]
- 225 ii. [d. Any sidewalk rack aligned perpendicular]
 226 *perpendicular* to the curb must be located so that the
 227 nearest vertical component of the rack is a minimum of
 228 48 inches [4 feet] from the curb face and 42 inches from
 229 the building face;[.]
- 230 iii. *diagonal* to the curb must be located so that the nearest
 231 vertical component of the rack is a minimum of 48 inches
 232 from the curb face, and 42 inches from the building face,
 233 measured in a line parallel to the orientation of the rack.

- [e]d. Each sidewalk rack must be a minimum of 14 feet from any stand-alone fire hydrant.
- [f]e. Each parked bicycle must be accessible without moving another bicycle.
- f. Rack placement should not conflict with ADA requirements.
- [g. A bicycle parking facility must have an aisle a minimum of 4 feet in width behind all occupied parking racks to allow room for bicycle maneuvering.]

Perpendicular Building Face

Perpendicular Curb Side

Parallel Building Face

Parallel Curb Side

Diagonal Building Face

Diagonal Curb Side

Minimum offset dimensions for short-term bicycle parking.

[2. Racks

A bicycle rack must:

- a. permit a bicycle frame and one wheel to be locked to the rack with a high security lock;
- b. permit a bicycle to be securely held with its frame supported in at least 2 places;
- c. be offset a minimum of 30 inches on center;
- d. be durable and securely anchored;
- e. have a locking surface thin enough to allow standard u-locks to be used, but thick enough so the rack cannot be cut with bolt cutters;
- f. have aisles a minimum width of 48 inches between racks;
- g. have a minimum depth of 72 inches between each row of parked bicycles; and
- h. perform as well as an inverted u-rack.]

* * *

Sec. 2. Effective date. This ordinance becomes effective 20 days after the date of Council adoption.

This is a correct copy of Council action.

Mary Anne Paradise
Acting Clerk of the Council
